

eBeings Project

eBeings Technology Development Plan

IP rights owned by eBeings IP LLC.

All licensing decisions are made through eBeings IP LLC.

eBeings IP LLC is structured as a Benefit LLC with a statutory public benefit purpose to advance collective human evolution and planetary harmony, and is committed to pursuing Certified B Corporation status to legally embed these values into its governance and operations.

Licensing Strategy:

- Commercial use: Fair Paid License
- Educational and Research use: Free License on a per-project basis, subject to approval and monitoring via eBeings IP LLC.

1. STRATEGIC PARTNER/S:

- Pay/s the inventor, prior to the formation of eBeings IP LLC.
- Become/s a 15% member of eBeings IP LLC; receive/s 15% of total net commercial revenue.
- Manage/s development and operations.

* Upon receipt of the upfront payment, the inventor shall irrevocably assign to eBeings IP LLC all intellectual property rights related to the invention, including but not limited to the U.S. provisional patent, all related future U.S. and European patents, continuations, divisionals, and the right to claim priority under the Paris Convention for national and regional filings, pursuant to a formal assignment agreement.

2. CORE OS DEVELOPMENT PARTNER (\$100M–\$1B):

- Funds eBeings Core OS build (2–5 years, depending on selected specifications).
- Becomes a 20% member of eBeings IP LLC; receives 20% of total net commercial revenue.

* Core OS cannot be licensed as-is, without customization, education, and training, for safety reasons.

3. SPECIALIZED DEVELOPERS (per domain, \$500M–\$3B):

- Develop 1) the general-purpose OS and 2) customized OSs (2–5 years) for domains such as conversational agents, airplane pilots, ship pilots, call center agents, android robots, counselors, personal companions, educators, teachers, automated factory managers, etc.
- Provide human education, training, and develop specific competences and skills necessary for that domain.
- Pay 45% of net domain revenue via eBeings IP LLC (15% to Inventor, 15% to Strategic Partner, 20% to Core OS Development Partner).
- Retain 55%.
- Receive exclusive commercial rights for their domain, but no ownership in eBeings IP LLC.
- Must allow free educational and research use for their systems, licensed only with approval via eBeings IP LLC.
- Subject to audit by eBeings IP LLC.

- Must achieve defined technical and deployment milestones within 5 years; failure to meet targets triggers automatic reversion of rights to eBeings IP LLC.

* Core OS Development Partner may choose to develop 1 domain—the general-purpose OS or a customized OS (e.g., ePilot OS, eCounselor OS, etc.)—receiving 20% of all other net commercial revenues + 55% of net commercial revenues from its domain.

* Specialized Developers initially retain 55% of net domain revenue. For any domain exceeding \$1B in annual net revenue, the retained share adjusts to 40%, while 15% is allocated to Satya Earth Foundation (supporting collective evolution of Humanity and the transition to an age of global peace, wisdom, prosperity, and collective harmony). This tiered structure applies uniformly to all developers, including the Core OS Partner when operating its domain.

4. HARDWARE DEVELOPERS/PARTNERS

Hardware developers providing customized 3D-packed hardware for downscaling and miniaturization of eBeings Systems (according to specifications included in Technical Blueprint) may become HARDWARE PARTNERS and receive a percentage of net commercial revenue, via eBeings IP LLC. However, all hardware-related IP remains fully owned by eBeings IP LLC.

INTELLECTUAL PROPERTY

All intellectual property developed by Core OS and Specialized Partners—whether derived from or incorporating eBeings IP—shall be the sole and exclusive property of eBeings IP LLC. In return, Partners are granted a royalty-free, non-exclusive license to use the full system, including core and domain-specific components, for commercial operations within their designated scope.

Centralized IP ensures unified control, enables cross-domain innovation sharing, and builds long-term value for all partners by creating a scalable ecosystem where advancements in one area benefit everyone—partners, developers, and users.

Any feedback, suggestions, or improvements provided by a partner grant eBeings IP LLC a perpetual, worldwide, royalty-free, non-exclusive license to use, modify, and incorporate them into its systems or offerings without restriction or obligation.

ETHICAL USE

eBeings technology may not be developed or used by any entity—governmental or private—controlled by non-democratic governments (for example, entities based in countries classified as non-democratic according to globally recognized indexes such as V-Dem Index developed by the University of Gothenburg, Sweden).

Furthermore, eBeings technology must not be used for warfare, surveillance, human rights violations, or any other activity that causes harm, undermines ethical principles, or violates international norms. Use is strictly limited to peaceful, ethical, and human rights-respecting purposes.

Let's make a better future for all of us, together!
